03 【residential design】

Shopping plaza forms as a continuous surface with floating funitures and features.

03 【residential design】

Central active activities with structured landform creates an active community core.

03 【residential design】

Marshy grassland, forest belt and prairie pods form a platform for the mix of programs.

04 【ecological restore】

【08/2013-12/2013】

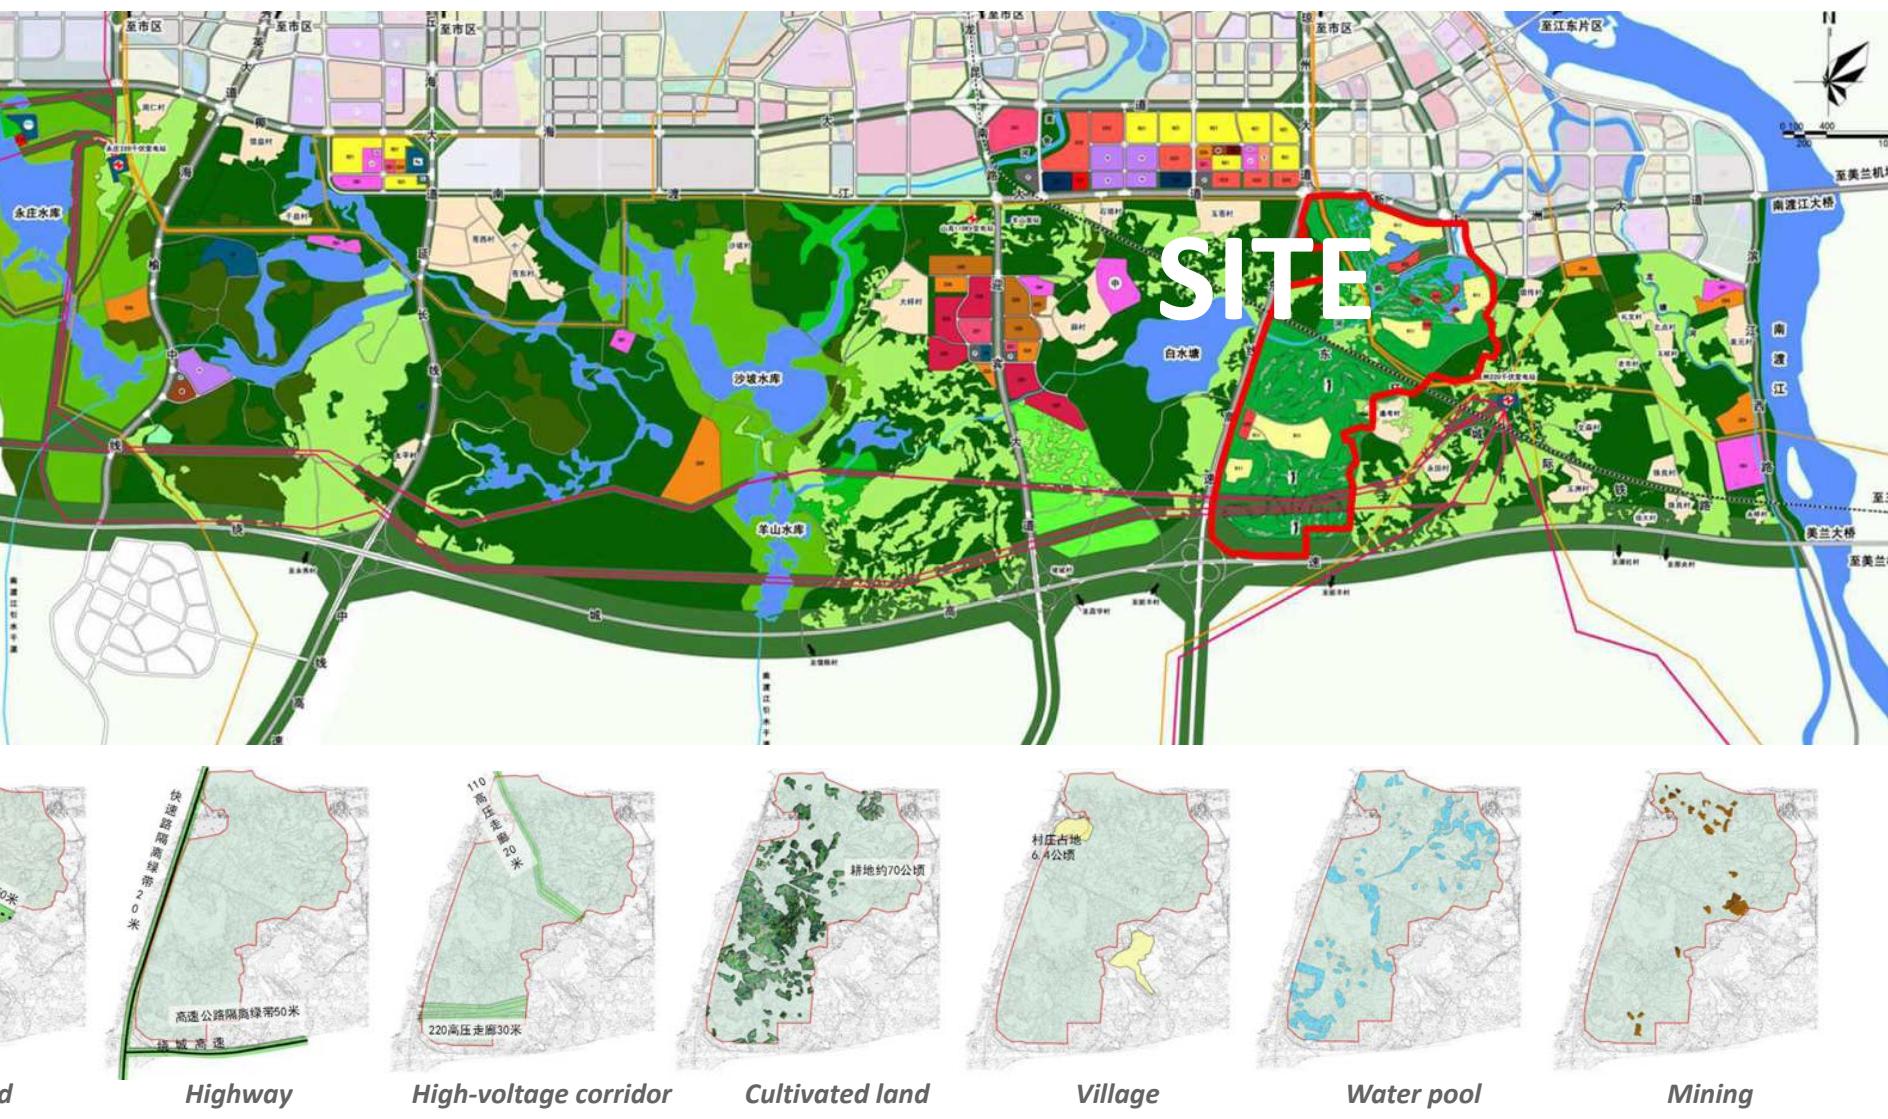

Participated in **outdoor sport center (ecological restore)**, Detailed Construction Planning, Haikou, Hainan, **China**

Concentration Area: Relationships between human behavior and the built environment, such as urban greenway and public spaces, human dimensions to built and natural system environment, geospatial pattern. In addition, I also focus on built adaptive reuse.

Located in the ecological green belt in south Haikou City, the site covers 400 hectares, about 3.4km north and south and 2km east and west. Once a quarry, it was severely damaged, surface uneven with potholes due to a lack of planning. The plan of the site involves business and classy hotels, based on the principle of ecological protection being the root, harmonious life the core and green production the basis.

05 [park landscape design]

【11/2015-12/2015】

Participated in *park landscape design* of Langfang in Hebei, ChinaConcentration Area: Design of *children's play* and learning environments, public open space design.

China has 360 million children, about 126 million live in urban area, today's rapid urban construction and the lifestyles are changing mutations all around, children are being taken free games space. Children - the future of the nation is in the cities that left their childhood holes in the corner and they are in crisis to find a free space. The development of children is the key and foundation of all sustainable development. This project concern from a professional perspective for children games space, a professional approach to children's play space planning, and ultimately to the use of expertise to explore how to build a child-friendly cities, thus promoting their full and healthy growth, and achieve real sustainable development.
